Allowable Subject Matter

1. Claims 23, 27, 31, 43, and 51 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As per Claims 23, 27, 31, 43, and 51.

The present invention is directed to a method for determining usage fees in a telecommunications network. Each independent claim identifies the uniquely distinct features "A billing system for determining telecommunications network usage fees, comprising: a first profile memory area configured to store a dynamic client profile for at least one customer of the telecommunications network, said dynamic client profile indicating an average cost of previous connections of the customer and being derived from at least one random variable of the previous connections; means for determining the at least one random variable with every new connection; means for changing the dynamic client profile depending on the determined at least one random variable; means for determining a usage fee based on

the stored dynamic client profile; a pre-paid amount memory area configured to store a pre-paid money amount associated with the customer, and means for debiting said usage fee from the pre-paid money amount.”

The closest prior art, Fenner, Lakshmi and Jain et al., disclose maintaining and changing service profiles built into the phone company database, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

The claims which depend from the above allowed claims are allowed based on their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
